Trackman®

We're covering new ground with our expanded lineup for the **John Deere® 8RT and 9030 models.**

Standard Agricultural Track & Ultra Aggressive Agricultural Track Enhancements:

- **10% More Cable** makes the track more durable by strengthening the carcass for longer life. With 5.3mm cable in the tracks, *we lead the marketplace!*
- **Twice as Much Wire**, the result of increasing the concentration of the wire and having 4 plies vs. 3, improves the tread wear and track performance by creating a stronger, more rigid track. The stronger foundation provided by the track carcass reduces internal track temperatures and improves tread lug performance and tread wear life.

Additional Design Features On Our Ultra Aggressive Agricultural Track:

- **Increased Tread Height and Width** puts more tread on the ground for longer tread wear life.
- **Tread Design** promotes lug strength and enables better clean out.
- **Thicker Carcass** provides a stronger foundation and optimizes the benefits of the new tread design.

Our warranty is on track with your needs. | In accordance with the Goodyear Engineered Products Trackman® Rubber Track warranty, the track is covered against material and/or workmanship defects. **For complete warranty information, contact your Goodyear Engineered Products Rubber Track dealer or visit our website at www.goodyearEP.com/rubbertrack.**

Goodyear Engineered Products Rubber Track is the industry's only American-made and American-owned rubber track.
